

This clever New Zealand-made oven doubles as an outdoor fire. It can stand alone on an optional stand, sit on a pre-made base or else be built-in to a wall.

The dual air slide system allows the Pizzeria 900 to reach maximum cooking temperature, an amazing 350°C, in the shortest of time periods. For heat retention and cooking precision both air slides can be manually closed. Also with a removable stainless steel pizza tray the Pizzeria 900 can cook the largest roasts.

Pizzeria 900

90cm w x 64.5cm h x 60cm d
sku GD997900
